

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## EDITORIAL COMMITTEE

C. E. ALLEN, Editor-in-Chief,  
*University of Wisconsin*

WILLIAM CROCKER,  
*The Thompson Institute  
For Plant Research, Inc.*

H. H. BARTLETT,  
*University of Michigan*

C. STUART GAGER, Business Manager  
*Brooklyn Botanic Garden*

ARTHUR H. GRAVES,  
*Brooklyn Botanic Garden*

R. A. HARPER,  
*Columbia University*

I. F. LEWIS,  
*University of Virginia*

C. L. SHEAR, *Bureau of Plant Industry*  
(Representing American Phytopathological Society)

The *Journal* is published monthly, except during August and September. Subscription price, \$6.00 a year. Postage to Canada, 20 cents; to other foreign countries (except Mexico and Cuba) 40 cents a volume on annual subscriptions. Single copies 75 cents. Back numbers, 75 cents each; \$7.00 a volume, post free.

The pages of the *Journal* are open to members of the Botanical Society of America, or to candidates approved for membership.

**Manuscript** offered for publication should be typewritten, and should in all cases be submitted to the Editor-in-Chief.

**Papers are limited** to 20 pages in length, exclusive of plates, except that additional pages may be arranged for at cost rate to authors (approximately \$3.00 a page).

**Proofs** should be corrected immediately on receipt, and returned to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y.

**Illustrations**, other than zinc etchings, and tabular matter should, in general, be restricted to approximately ten percent of the number of pages of text. Authors may be charged at cost rates for illustrations and tabular matter in excess of that amount (approximately \$6.40 a page for tabular matter; 15 cents per square inch for half-tones).

**Separates** should be ordered when proof is returned. Fifty copies without cover will be supplied free; cover and additional copies at cost.

**Remittances** should be made payable to American Journal of Botany. Ten cents must be added to all checks not drawn on New York City banks.

**Claims for missing numbers** should be made within 30 days following their date of mailing. The publishers will supply missing numbers free only when they have been lost in the mails.

**Correspondence concerning editorial matters** should be addressed to Prof. C. E. Allen, University of Wisconsin, Madison, Wisconsin.

**Business correspondence**, including notice of change of address, and directions concerning reprints, should be addressed to American Journal of Botany, Brooklyn Botanic Garden, Brooklyn, N. Y., or The New Era Printing Co., Inc., Lancaster, Pa.

## Here's a Pick that's built for business!

### The Cambridge Field Pick No. 10-J-7

This popular pick will be shipped, prepaid, to any address in the United States on receipt of \$3.50.

FOR digging, barking, root cutting and, in emergencies, for wood cutting, the Cambridge Field Pick is the botanist's favorite tool.

This pick, designed by an experienced collector, is constructed to stand use and abuse, to endure through years of strenuous service.

Its sturdy blade, with  $1\frac{1}{2}$ -inch chopping edge and French bayonet point is forged from the keenest cutting tool steel. Each head is tempered separately, and is guaranteed to be free from flaws and softness. The stout, 12-inch handle of straight grained hard wood is fashioned to give perfect "balance" to the tool.

## CAMBRIDGE BOTANICAL SUPPLY COMPANY

*Laboratory Equipment for All Sciences*

WAVERLEY, MASS., U. S. A.

*Send for complete, illustrated catalog of BIOLOGICAL EQUIPMENT*

## Strong and Capacious Collecting Cases

Attractively finished in fine green japanning, with hinged cover running the full length of case, and metal loops for shoulder strap.

*An adjustable shoulder strap is furnished with each vasculum.*

AMATEUR SIZE (A),  $16'' \times 7\frac{1}{2}'' \times 5''$ , for ordinary field trips ..... \$3.50

CLASS SIZE (B),  $19'' \times 8\frac{1}{2}'' \times 5\frac{1}{2}''$ , designed to meet the needs of class trips in the field ..... 3.75

ADVANCED BOTANY SIZE (C),  $21'' \times 9\frac{1}{2}'' \times 6''$ , very capacious and especially suited for advanced students and departmental collecting ..... 4.00

Special prices for Plant Presses, Mounting Paper, Genus Covers, Drying Felts, and other botanical accessories.

MICROSCOPE AND LANTERN SLIDES, for courses in Botany and Zoology.

Catalogue will be sent on request.

NEW YORK, N. Y.

# Non-Corrosive MICROSCOPE SLIDE COVER GLASSES

Nos. 8811-12

Nos. 8813-14

No. 8815

- 8811. SLIDE COVER GLASSES, Square, No. 1,** thickness 0.13 mm. to 0.17 mm., made of the best Salin Glass of uniform thickness. These cover glasses are of a composition, which gives them practically no color and yet enables them to withstand the corrosive effects of moisture with more fortitude than the white glasses rich in metallic silicates, which readily cloud. Packed in  $\frac{1}{2}$  ounce boxes.

| No.                       | A             | B             | C             | D      |
|---------------------------|---------------|---------------|---------------|--------|
| Size, inches              | $\frac{5}{8}$ | $\frac{3}{4}$ | $\frac{7}{8}$ | 1      |
| Size, mm.                 | 15            | 18            | 22            | 25     |
| Approximate No. per ounce | 296           | 206           | 150           | 116    |
| Per ounce                 | \$1.60        | \$1.60        | \$1.60        | \$1.60 |

10% discount in lots of 25 ounces. 20% discount in lots of 100 ounces.

- 8812. SLIDE COVER GLASSES, Square, No. 2,** thickness 0.17 mm. to 0.25 mm., same as No. 8811, but heavier. The optics of compound microscopes are corrected for this thickness of cover glass. Packed in  $\frac{1}{2}$  ounce boxes.

| No.                       | A             | B             | C             | D      |
|---------------------------|---------------|---------------|---------------|--------|
| Size, inches              | $\frac{5}{8}$ | $\frac{3}{4}$ | $\frac{7}{8}$ | 1      |
| Size, mm.                 | 15            | 18            | 22            | 25     |

## "Edinger" Drawing and Projection Apparatus

### ORIGINAL MODEL

This valuable instrument permits a universal application and is indispensable for lecture rooms.

Some of its many ways of usage are:

1. Micro-Projection with low and high power objectives—in horizontal and vertical position.
2. Projection of lantern slides.
3. Drawing and tracing of projected microscopical images.
4. Photomicrography—without special microscope.
5. Photography of microscopical and very large specimens.
6. Plastic reconstruction work.

The "Edinger" Apparatus can be supplied with either of the following illuminants:

**HAND FEED ARC LAMP  
AUTOMATIC FEED ARC  
LAMP**

NOTE: Hundreds of institutions are using the apparatus—some institutions a number of them—and many additional institutions have placed orders.

*Pamphlet No. Z-1019, will be sent upon request.*

# GENETICS

Published by the

## SPENCER Convertible Binocular Microscope, No. 58

In addition to regular microscopic work, this instrument is convertible:

- For examining large objects on a table.
- For examining vertical surfaces.
- For examining high objects.

### Advantageous Features

- I. Inclination joint.
- II. Removable stage.
- III. Long range of upward and downward movement.
- IV. Adjustable arm covering entire stage.
- V. Mirror adjustable in all directions.
- VI. Accommodation for pupillary distance.
- VII. Automatic shutter cutting off light to either eye.
- VIII. Patented solid objective mount, holding lenses in absolute alignment.

**ADAPTABILITY, USABILITY AND EFFICIENCY AT ITS BEST**

# A Binocular Microscope for Research Work

*Microscope FAE.8*  
Price, \$227.50.

Microscope FAE, binocular type, using Single Objectives for the full range of powers, is a most useful instrument for prolonged observation. It is used with great satisfaction by leading research and laboratory workers. The following advantages are offered:

As the eyepiece tubes are mounted in a parallel position, both eyes are free from the strain of accommodation or convergence.

The user is given the impression of increased penetrating power, permitting him better to interpret what is seen.

It yields brilliancy of field and improved quality of image.

Provides maximum range of adjustment for interpupillary distance; left eyepiece is adjustable.

As the right eyepiece is rigid and vertical, the Camera Lucida may be used if desired.

*Write for literature or other information on this or other Bausch & Lomb Microscopes.*
